

2200 ANTI-SEIZE

Technical Data Sheet

Anti-Seize 2200 is a special blend of graphite and micro size aluminum flake particles homogenized into a highly viscous, nonvolatile carrier. It is non-melting and provides superior protection against galling, corrosion, and heat freeze. Anti-Seize 2200 prevents metal to metal contact under severe variations of temperature, cyclic loading, and pressure. It withstands higher temperatures than copper-based compounds and will not drip or run. It will provide clean breakouts from high torque and is very economical to use.

Uses and Features:

- Prevents seizure
- Prevents galling
- Provides smooth torque readings
- Color - silver
- Lead free
- Temperature Range:
-65° to 2200°F
-54° to 1200°C
- Flash Point: 380°F
- Dropping Point: None

Applications:

- Bolts & Bushings
- Low RPM Bearings & Gears
- Spark Plugs
- Chains & Drives
- Cylinder Head Assemblies
- Gaskets
- Furnaces
- Rollers and Conveyors
- Shaft Couplings

Anti-Seize 2200 is available in:

- 13111 24-8 oz. brush top cans
- 13117 12-16 oz. brush top cans
- 13123 10 lb. pail
- 13135 5 gal./40 lb. pail
